

The *Vantage* Brand Kit.

Colors. Type. Voice. The buyer. Everything you need
to keep the brand consistent across every channel.

CHAPTER I · THE BRAND IN ONE PARAGRAPH

What we are.

And what we promise.

The Vantage turns one listing photo into a cinematic 1080p vertical reel. The whole product is built around a single promise: **you shoot the listing, we deliver the film.** Three minutes from upload to a finished MP4 ready for Reels, TikTok, the MLS, your client email, your story.

The aesthetic is deliberate. Not tech. Not SaaS. The Vantage looks and reads like a luxury real-estate magazine — bone paper, ink type, brass accents, serif headlines that breathe. The buyer is a real estate professional whose work product is itself a luxury good. The brand has to match that.

Every photo deserves a film. Every listing deserves a vantage point.

EDITORIAL

CINEMATIC

PROFESSIONAL

We are a magazine, not a SaaS dashboard. Every page is a spread. Every CapS is a buyer's digest. The output looks like

CHAPTER II · THE PALETTE

Color.

Bone. Ink. Brass.

Nine colors total, organized as warm-bone paper grounds, ink/onyx primary text, and brass + rust accents. Never use pure white. Never use pure black. The bone-paper backgrounds are what make the brand feel like an editorial spread rather than a SaaS app.

Bone

#F4EFE6

Primary page background. Use everywhere as the canvas.

Cream

#EDE6D6

Featured card background. One shade warmer than bone.

Parchment

#FAF6EE

Lifted surface — file drop zones, lightest tier.

Ink

#0E0E0C

Primary text + featured CTA fill. Never use pure black.

Onyx

#1A1816

Premium-tier dark background. Subtle warm undertone.

Graphite

#2A2724

Dark surface alternate, slightly more lifted than onyx.

Ash

#6B6760

Body prose color — never use a true grey.

	Smoke #A39E94 Tertiary text, disabled state, dividers on dark grounds.
	Champagne #C9A96E Accent gold — italic display callouts on dark grounds.
	Brass #8C7A52 Eyebrow labels — Space Mono caps in this color.
	Rust #8C3F2E Editorial accent — italic running heads, highlights, premium tags.

Hairlines are `rgba(14,14,12,0.12)` — an ink wash, never a true grey line. **Strong hairlines** at 0.32 opacity.

Shadows are deep ink with long, soft falloff (0 60px 120px -40px `rgba(14,14,12,0.34)`) — never use the default Tailwind shadow.

CHAPTER III · TYPOGRAPHY

Four typefaces.

Used exactly this way.

Playfair Display headlines the brand. Cormorant Garamond carries longer serif passages. Inter takes the prose. Space Mono is the eyebrow voice — mono caps with wide letter spacing, used at small sizes only. Mixing in any other font breaks the spell.

DISPLAY · HEADLINES AND HERO TYPE

Every photo deserves a film.

Playfair Display · 500 weight · tight tracking (-0.015em) · used for all H1/H2 hero type.

DISPLAY ITALIC · ACCENTS WITHIN H1

Every social format,

The italic variant carries the second line of a two-line hero. Painted in champagne on dark grounds.

SERIF · LONGER BODY AND PULL QUOTES

A vantage point on every listing.

Cormorant Garamond · 400 weight · used for long-form serif passages and editorial pull quotes.

SANS · PROSE, CAPTIONS, BODY COPY

The brand reads like a magazine, never a dashboard.

Inter · 400 weight · 17/1.7 line-height on desktop. Color is Ash (#6B6760), never pure grey.

EYEBROW · LABELS, CTAS, MARQUEES

THE PITCH · ONE-STOP SHOP

Space Mono · 0.32em letter-spacing · uppercase only · size 10-11px · color Brass (#8C7A52).

CHAPTER IV · UI PATTERNS

Buttons, cards, *and the rhythm of the page.*

Buttons

All buttons are **Space Mono caps** with wide tracking. No rounded corners — the brand is editorial, not friendly-tech. Two variants: **Ink button** (filled ink on bone, inverts to bone on hover) and **Bone button** (filled bone on dark grounds). Padding is generous: 14px 26px, minimum 46px tall.

Primary (ink fill)

Secondary (bone)

Tertiary (cream)

Eyebrow labels

The signature element of every page. Space Mono caps in Brass, preceded by a 24px champagne hairline. Never larger than 11px. Always tracked to 0.32em+. Used to introduce every section like an editorial column running head.

CHAPTER IV · UI PATTERNS

THE PITCH · ONE-STOP SHOP

AS SEEN IN · INMAN, HOUSINGWIRE, FORBES

Cards & grids

Cards are **flat rectangles** with hairline borders. No drop shadows under normal cards. Featured cards (Done-For-You, Listing Bundle) flip to **ink fill on bone**, with a rust tag in the top-right corner ("DONE-FOR-YOU")

and a deep ink shadow. Grids are always 3-up on xl, 2-up on md, 1-up on mobile, with a generous 24-32px gap.

The wordmark.

And how we sound.

Logo

The wordmark is **The Vantage**, set in Playfair Display Italic at the size of the surrounding hero. "EST. 2026" sits to the right in Space Mono caps with 0.4em tracking, Brass color. Never lock the wordmark to anything else. Minimum clear space is 1× the cap-height of "V" on all sides.

The Vantage EST. 2026
CINEMATIC LISTING FILMS

Voice

We sound like an editor, not a marketer. Short sentences, italic callouts, dry confidence. We never use exclamation points outside of single-CTA contexts. We never use "unlock", "revolutionary", "AI-powered", "transform your workflow". We say *cinematic, magazine-grade, three minutes, every listing deserves a vantage point*.

Do say

Every photo deserves a film. • Cinematic listing films, not AI videos. • Done-for-you in three minutes. • Magazine-grade output. • Six camera moves. • You shoot the listing, we deliver the film.

Don't say

Revolutionary AI. • Unlock your potential. • Game-changer. • Transform your workflow. • Powered by [model name]. • Generate a video. (We render a film.)

CHAPTER VI · THE PRODUCT

Seven films.

One upload each.

Every film starts with a single photo (or 3–6 for the bundles) and ends with a 1080p vertical MP4 sized for Reels, TikTok, and the MLS. Films are credit-priced; users get 60 free credits on signup, enough to test every category before any payment.

#	FILM	CREDITS	WHAT IT DOES
01	<i>Done-For-You Reel</i>	200 credits	Upload 3–6 photos in your preferred order. We render each as a cinematic clip then auto-stitch into one finished MP4 with your price and realtor name. Editorial, Snappy, Cinema, or Minimal style. Most popular.
02	<i>The Listing Bundle</i>	180 credits	Same 3–6 photos, but you get the individual clips back to mix in your own editor. For photographers and editors who want full control.
03	<i>Virtual Staging</i>	60 credits	Upload one empty room. The room dresses itself in your chosen style — modern, mid-century, coastal, farmhouse, luxury, scandi — then the camera glides through.
04	<i>Sun-Up to Sundown</i>	60 credits	Upload one daytime exterior. We render a static-camera time-lapse through sunrise, golden hour, and dusk in a single 10-second clip.
05	<i>Sketch to Reality</i>	60 credits	A pencil sketch on a wooden desk transforms into the real photo, then the camera reveals the finished space. The signature reveal moment.
06	<i>Animate Single</i>	30 credits	One photo. One cinematic shot. Pick from sixteen camera moves — push, pedestal, truck, pan, dolly, orbit, roll, and more.
07	<i>Floor Plan to Walk-through</i>	30 credits	Upload your floor plan or axonometric drawing. The plan transforms into a photoreal interior, then the camera moves through the space.

CHAPTER VII · THE AUDIENCE

Who we built this for.

And why they pay.

The Vantage exists for a specific kind of professional: one whose work product is photographs of luxury real estate, and whose competitors are starting to post video. The pain we solve is **the gap between shooting and posting** — the four hours of Premiere or DaVinci that nobody wants to do after a 10-hour shoot day.

PRIMARY

Listing photographers

\$1,200–\$3,500 per shoot · 40–60 listings/year · Lightroom + Photoshop, no editor on staff. They sell stills but get asked for video. They lose deals to photographers who offer reels. The Vantage is the upsell that lets them charge \$300 more per shoot for a Reels package they used to outsource.

SECONDARY

Listing agents (solo to small-team)

\$500K–\$5M+ price points · 12–40 deals/year · Posts to Instagram, MLS, and email. They've tried CapCut, hated it. They want one file they can post in five places. The Vantage delivers the file.

TERTIARY

Real-estate marketers + brokerage staff

Brokerage marketing leads who need to ship listing content across 20-200 agents weekly. They buy in seats and bulk credits. They care about consistency, brand, and turnaround.

ADJACENT

Airbnb / vacation-rental hosts

\$200–\$800/night nightly rates · Style-driven listings. They want Reels for Instagram and TikTok to drive direct bookings. They land via the airbnb-specific landing page.

ADJACENT

Custom-home builders + renovators

Sell finished build galleries. They use the Transformation flow, not Listing — but it's the same checkout, same credits, same brand.

Who buys today.

Specifically. Not in theory.

If you're hand-prospecting your first 50 paying customers, these are the exact people most likely to convert this week. They are pre-qualified by behavior, not demographics.

THE FIRST 50 · IDEAL CUSTOMER PROFILE

BUYS THIS WEEK

The Reels-Already-Trying Listing Photographer.

- Posts listing photos to Instagram with 1k–10k followers.
- Has tried one or two AI video tools (Runway, Pika) and given up.
- Charges \$1k+ per shoot, sees video as the next \$300 add-on.
- Already pays for Lightroom, Photoshop, an editing preset pack.

Why they buy today, not next quarter

Every other AI video tool serves them with a horizontal video they can't use, requires a 60-prompt onboarding, and charges \$30/month with no trial. The Vantage gives them a vertical 1080p MP4 in three minutes, 60 free credits to ship their first reel with no card, and a price that starts at \$39 — below their next coffee subscription.

THE TRIGGER

Their last listing got 4× engagement when a competitor posted video. They're searching this week.

THE FRICTION

Their existing tools (CapCut, iMovie, Runway) all failed them. They want one MP4 they can drop into Reels.

THE CLOSE

60 free credits = first reel free. The reel sells the product. Subscription kicks in week two.

Where to find them this week

CHANNEL	PLAY
<i>Instagram</i>	Hashtags: #listingreels #realestatereels #luxurylistings #realestatephotographer · DM the recent posters; mention their actual listing.
<i>Reddit</i>	r/SideProject + r/aivideo for the technical angle. r/realtors is hostile to promotion — skip.
<i>Direct referral</i>	Existing happy users — ask each for one warm intro. Convert rate ~4× cold.
<i>Brokerage marketing leads</i>	Mid-size brokerages (20–200 agents) who don't have an internal video team. Email the marketing director, not the broker.

APPENDIX · USAGE NOTES

Don't break the spell.

A short list of mistakes.

Don't use pure white or pure black.

Bone (#F4EFE6) and Ink (#0E0E0C). Always. Pure white kills the editorial feel and pure black makes the brand look like a generic SaaS.

Don't round any corners.

Every card, button, and image is a flat rectangle. Rounded corners read as friendly-tech — we are editorial.

Don't use emoji in product UI or marketing copy.

Eyebrow markers (·) and arrows (→) are the only ornaments. Save emoji for occasional Suno-style music labels.

Don't show the model name (Seedance, Kling, GPT-Image, Replicate).

Users buy The Vantage, not the underlying pipeline. We describe what the camera does, not what the model is.

Don't write "AI-powered".

We are a film studio that happens to use machines. Say cinematic, not AI.

Don't say "generate".

We render films. We don't generate videos.

Don't use Tailwind's default shadow.

Long, soft, ink shadows only: 0 60px 120px -40px rgba(14,14,12,0.34).

Don't mix typefaces.

Four fonts total. No Roboto, no Open Sans, no system-ui fallback in headlines.

Every photo deserves a film. Every brand decision deserves this brief.
